The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-58 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nofre et al in view of Kataoka et al.

Nofre et al disclose N-[N-(3,3-dimethylbutyl)-L- $\alpha$ -aspartyl]-L-phenylalanine 1-methyl ester as a dipeptide sweetening agent (see entire patent).

The claims differ as to the formation of granules.

Kataoka et al disclose the production of dipeptide granules using a compaction process as is claimed (see entire patent).

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use the compaction process of Kataoka et al in that of Nofre et al because the compaction of dipeptide sweeteners is conventional in the art.

In the absence of unexpected results, it is not seen how the claimed invention differs from the teachings of the prior art. Applicant's claims are drawn to a combination of known components which produces expected results, see In re Kerkhoven 205 USPQ 1069 and In re Gershon 152 USPQ 602.

All of the claim limitations have been considered. None of them are seen as serving as basis for patentability.
